What's New in the?

photoResizer for Iphoto DVD is an application designed to resize images in single or batch mode to a standard dimension for TV screens. User interface The program provides a minimalist look with only one main attribute, the resize function. You can browse all your drives through the image directory tab on the left of the window. Once you select your desired folder with the files that need to be resized, a preview of all the images will be shown in the middle column. The last one displays one picture at a time. Resize to screen formats The resize function provides 6 types of screen sizes to choose from, according to your TV resolution. NTSC, National Television System Committee, is an analog television system which allows color television broadcasting. You can choose from DVD (720*480), SVCD (480*480) and VCD (352*240). PAL, also known as Phase Alternating Line, is a color encoding system used in television systems, broadcasting at 625-line / 50 field. Three selections can be made, just like in the case of NTSC: PAL DVD (720*576), PAL SVCD (480*576) and PAL VCD (352*288). Resize, rename and rotate images The "Action" menu has only the batch resize function. However, more options can be chosen from the images preview. You can mark specific photos by combining the mouse buttons and Shift or Ctrl. From the right-click menu you can rotate the selected pictures by 90 degrees clockwise or counterclockwise, or by 180 degrees. All or just the selected photo files can be renamed by specifying a digit to start the new names with, followed by other characters. You can also delete them one by one or in batch. No confirmation message pops up, so make sure you don't accidentally delete pictures you need. Conclusion Overall, PhotoResizer for Iphoto DVD is a useful application that helps resize and rotate images using 6 types of TV screen formats. PhotoResizer for Iphoto DVD Download The PhotoResizer for Iphoto DVD Download is a utility that will let you download videos from itac.com and convert them to various image formats.
