On one of my view, the user enters a telephone number and he then uses a button to validate the number. In order to validate the phone number, I used an javascript function that uses regex to check if the phone number has a good format, if not, show an alert popup. This works fine on IE, Chrome, Firefox, but not Safari, for whatever reason, in which the user has to click on the button to see the field, but nothing happens when he clicks on it. This is my code in the Razor view:
@{Html.RenderPartial("_PhoneDataEntry", Model);} @Html.TextBoxFor(Model => Model.Telefono, new { @class = "pwd_input" }) @Html.ValidationMessageFor(Model => Model.Telefono)
@{Html.RenderPartial("_PhoneButton", Model);} @Html.ValidationMessageFor(Model => Model.Telefono) The function that I use to validate the input number is this: function
PhoneNumber(input) { var regex = /^\\d{3}\\-\\d{3}\\-\\d{4}\$/;
