Who we are

The VinaCapital Foundation (VCF) is a USA registered 501-c3 public charitable organization, licensed as an international non-governmental organization in Vietnam. Founded in 2006, VCF's mission is to create healthcare and education solutions to transform the lives of underserved and marginalized children and women in Vietnam. The work of VCF touches the lives of millions of Vietnamese in 63 provinces.

GRASSROOTS MEDICAL PROGRAMS

Provide medical assistance to underserved children and adults. Through financial and psychosocial support, our programs reach each individual at the "person to person" level.

HEARTBEAT VIETNAM - Funds heart surgeries for poor children.

RURAL OUTREACH CLINICS - Provides free medical examinations in rural Vietnam.

CARE TO RISE - Takes care of and supports disadvantaged children and orphans affected by the Covid-19 pandemic.

GRASSROOTS ASSISTANCE - Assists children with retinopathy, hearing impairment, cancer, and other health complications.

EDUCATION PROGRAMS

We pave the way into a better future through education. Our programs transform ethnic minority female students into agents of change in their communities.

BRIGHTER PATH SCHOLARSHIP - Awards scholarships, provides mentoring, and organizes annual empowerment meetings.

BRIGHTER PATH GIRLS' CLUBS - Organizes after-school club activities to provide knowledge and soft skills training in legal rights, sexual and reproductive health, financial literacy and leadership.

HEALTHCARE CAPACITY BUILDING PROGRAMS

Enhance the healthcare system throughout Vietnam by organizing training, donating critical equipment and water filtration systems, and assisting the country in time of emergency.

SURVIVE TO THRIVE - Provides emergency training and equipment for emergency and neonatal care in rural hospitals.

CLEAN WATER - Installs filtration systems to provide potable water for underserved communities.

NATIONAL EMERGENCIES - Organizes and implements disaster and pandemic relief.

A Letter from the CEO

Dear Friends,

It is with sincere gratitude and great pride that I present VinaCapital Foundation's (VCF) Annual Report for 2022 to those of you who have supported VCF's work as well as to those of you who have an interest in learning more about us. It was a spectacular year with many challenges and opportunities, but the talented staff with help from a wide array of stakeholders met the challenges. Every important category of our work increased in numbers, improved in quality or both.

My annual report presentation always begins with the grateful acknowledgement for the two visionaries, Don Lam and Robin King Austin, who created VCF in 2006 and laid a solid foundation for a future of saving the lives of children, improving the lives of girls and their mothers and building a resilient middle class in Vietnam. As you look over the enclosed accomplishments that Don and Robin set in motion, it is important to note that VinaCapital Group, of which Don Lam is the CEO, funds all VCF's Administrative and Fundraising expenses. Because of that fundamental support all other donations go 100% to the program/s donors choose.

This year at VCF I am particularly proud of VCF's commitments to diversity, equity and inclusion, women's rights, and gender equality. These values are the foundation for VCF's transparency in our financial transactions, the donor participation in our work, strategic partnerships with the government of Vietnam, promotion and implementation of the Sustainable Development Goals (each of VCF's 7 national programs fulfills 3 or 4 of the 17 SDG's) and the clearly quantified impact of our grassroots medical, healthcare capacity building and education programs. Many of these important core commitments that undergird our work go unnoticed. It is noteworthy that VCF's annual audit is an international audit by a Big 7 firm, VCF's Board of Directors is currently 50/50 female/male, the staff is 75% female, with senior management 57% female with one transgender person. In the past our programs were partnerships with the government of Vietnam but most often at the provincial level. Our programs have developed into key ingredients of national government priorities, forging strong relationships and respect with organizations such as the Central Youth Union (CYU), the Ministry of Foreign Affairs (MOFA), the Ministry of Education and Training (MOET) and the Ministry of Health (MOH). Late in 2022, the new VCF National Cancer Program for Children began the conceptual stage. It is one good example of a countrywide MOH partnership and the Brighter Path Girl's Clubs collaboration with CYU, MOFA and MOET is another.

VCF and Heartbeat Vietnam have been hard at work with nearly 10,000 heart children assisted over 16 years with 807 operations contributing to that milestone in 2022. Also in 2022, over 48,000 rural children were screened for congenital heart defects via 80 outreach clinics, billions of dong in medical training and equipment were invested in the most underserved rural areas, the further expansion of our ethnic girls' education and empowerment program gained momentum, life-changing clean water solutions were implemented, and significant progress was made with the health and education of our 2,300 Covid orphans. VCF has impacted the lives of hundreds of thousands of people in 2022. The VCF staff worked "double and triple hard" to accomplish these achievements. And the accomplishments were achieved despite continued hurdles caused by the pandemic early in the year.

VCF's fundraising follows our good work and exceeded both the 2022 budget as well as the previous year's 2021 income. The seasoned back and middle office teams excelled throughout the year in keeping overhead expenses in line with income. The Marketing and Communications team stepped up many times with creative solutions for the successful public presentation of our work while continuing to promote the existing program portfolio of outstanding results.

Health and education programs are fundamental to the progress of any developing country. VCF works with local, provincial and the national government of Vietnam, bi-lateral funders, individuals, and corporations to address specific gaps in the education and healthcare systems. As mentioned, VCF's work harmonizes with the United Nations Sustainable Development Goals in all of our program work. We believe that progress in gender equality and women's rights are greatly enhanced by ensuring healthy children for mothers and empowering vulnerable and marginalized girls. VCF's program work has been recognized by government leaders and other third-party evaluators at national and international levels as some of the most relevant, efficient, and effective in Vietnam. The Prime Minister recognized our contributions in a ceremony in Hanoi. Our solutions are evidence-based and data-driven, but we must never forget that every data point represents a beneficiary who suffers and a family who may still live in poverty. As you will realize from your journey through this 2022 Annual Report every beneficiary has a life-changing story to tell because of your support for VinaCapital Foundation and our determination to never fail you, our Board, the government of Vietnam, or the beneficiaries in our passion to improve this wonderful country, Vietnam.

Please examine this 2022 Annual Report and enjoy the outstanding results of your support if you are a donor. If you are interested in investing in our life-changing work and you are evaluating us, let me know of any questions. There is much more to tell!

VCF also organizes many other activities every month with many partners, to celebrate special occasions for children, or distribute gifts and timely support to disadvantaged children and families in need.

NHU NGOC: A COVID-19 ORPHAN WITH PERSEVERANCE AND HOPE FOR A BETTER FUTURE

Nhu Ngoc, 13 years old, is one of more than 2,300 Covid-19 orphans in Ho Chi Minh City whose life VCF's Care to Rise (CTR) program has transformed with healthcare and education assistance.

Like many Vietnamese children from underprivileged communities, Nhu Ngoc was born into a life full of challenges, pain and financial instability. After her father passed away from health complications due to Covid-19 in 2021, her mother became the sole breadwinner and caregiver for Ngoc and her older sister.

Losing the major source of income and support, this devastated Ngoc's family both on an emotional and financial level. Even before the father's death, they were scarcely getting by. Ngoc was plagued with two serious illnesses, one that would leave her blind.

Understanding the hardship facing Ngoc's family, VCF's Care to Rise program extended our assistance to support the government's efforts to improve the quality of life for Ngoc and her family. Since November 2021, Care to Rise program has helped thousands of orphans and disadvantaged Covid children affected by the pandemic to access healthcare and education solutions and to address psycho-social needs.

In April 2022, the Care to Rise program arranged and paid for Ngoc to have a thorough health examination at Ho Chi Minh City Children's Hospital. Ngoc was diagnosed with Trichiasis, a medical condition in which her eyelashes would grow inward, causing pain and inflammation to the eyes. This poses a serious risk of scarring the cornea and blinding the patient. Ngoc also received a diagnosis of Eyesight Accommodative Dysfunction in conjunction with varicose veins, subjecting the small girl to blurred vision and swollen, enlarged veins in her legs and feet

On June 15, Care to Rise scheduled life-changing eye surgery for Ngoc. VCF also funded Ngoc's new glasses to aid with her vision, regulating her eyes and allowing for more stable vision. Her vision problems are corrected. She has also been prescribed temporary medicine to lessen the swelling in her legs as more effective measures such as surgery or treatment are still being reviewed. This assistance will serve as a solid foundation for Ngoc to grow, learn, dream and take advantage of a whole new world of possibilities.

The Care to Rise program continues to assist in the government's efforts to improve the lives of disadvantaged children affected by Covid-19 like Nhu Ngoc. It was a joy to know that what we provided her would give her a chance to live a normal, healthy life. We are all so proud of Ngoc for her bravery despite the challenges, especially as she is able to maintain excellent study results and was awarded a scholarship by Care to Rise, a testament to her strength and determination. Through sharing Ngoc's story, we hope to ignite a spark of hope in children with experiences like Ngoc's. While the initial landscape might appear hopeless, Care to Rise will walk every single step with every single child to be sure no child is left behind. Care to Rise will lead them hand in hand every step of the way.

GERMAN CONSULATE GENERAL IN HCMC AND VINACAPITAL FOUNDATION PARTNER TO IMPROVE NEONATAL CARE IN QUANG NGAI PROVINCE

On the morning of October 10, 2022, at the office of the German Consulate General in Ho Chi Minh City, Dr. Josefine Wallet - Consul General of Germany in Ho Chi Minh City and Mr. Rad Kivette - CEO of VinaCapital Foundation (VCF) signed a memorandum of understanding to fund VCF's Survive to Thrive program.

9 pieces of Neonatal Care equipment donated

With this grant, the German Consulate General in HCMC sponsored 9 essential pieces of neonatal care equipment, including continuous positive airway pressure (CPAP), bedside monitor, led-phototherapy, infant warmer, injection pumps, infusion pumps with a total value of 380 million VND (equivalent to 17,862 USD). These essential pieces of equipment were donated to Son Tay District Health Center of Quang Ngai province. The aim is to improve the facility's capacity for neonatal emergencies in order to reduce infant mortality in this district.

Provided pediatric emergency training for healthcare workers

On October 26, VCF also implemented pediatric emergency training with the participation of 24 doctors and nurses at Son Tay District Health Center. Healthcare workers from other districts attended. Through the training course, the nurses and doctors learned to confidently handle pediatric emergency situations and gained more skills in detecting congenital heart defects through medical equipment sponsored by VCF's Survive to Thrive program.

HIGHLIGHTED STORY

JOINING GIRLS' CLUB, CHANGING LIVES

**“If I had
one word
to say to
the Girls'
Club, I just
wanted to
say thank
you so
much!”**

*said by one club member
as an expression of
support.*

The Brighter Path Girls' Club of Nguyen Hue High School, Thai Nguyen province, was established in early 2022, consisting of 40 ethnic minority female students from 10th grade in the 2021-2022 school year. In more than a year of operation, the club has matured all of the girls through many student-led exciting and impactful activities. The core “club” education is legal rights, sexual and reproductive health, leadership skills and financial literacy.

What makes the Brighter Path Girls' Club special is that it creates a safe and comfortable environment for the girls in the form of an exciting, innovative yet intimate meeting place for club members and friends.

With the help of the program team, the students are encouraged to come up with innovative methods of sharing knowledge and problems. Sharing is voluntary and no one feels pressured. Although each member comes from different classes, ethnicities and cultures, the club's team spirit always makes everyone feel welcomed, happy and eager to join in the activities. After the first sessions with warm-ups and self-introductions, the atmosphere completely changes from shyness into an active and inquisitive mood. The girls find new friends with similar experiences, new relationships develop and strength in numbers begins to build and self-confidence increases.

The Girls' Club of Nguyen Hue High School is very active every Monday or Saturday afternoon, and the members organized two events for the school. In its initial introduction in front of the whole school, the club held a contest to showcase ethnic costumes and a Q&A with the club members, which helped the club receive more attention and interest from other students.

The second school-wide meeting was arranged with the topic of gender and gender equality. The club members organized a skit entitled, “Give me a son.” The play reflected the issue of gender discrimination which is common among ethnic minorities who have no knowledge of gender equality. The event was so enthusiastically responded by all students of Nguyen Hue High School that right after the event, there were many more students who wanted to join the club!

Many positive comments poured in such as “The club is really interesting,” “meaningful knowledge activities,” “thank you for teaching us very good knowledge and ideas.” The Club also created their own Facebook page to frequently update their activities and answer questions or inquiries from other students.

HIGHLIGHTED STORY

JOINING GIRLS' CLUB, CHANGING LIVES

**The stronger
the Girls' Club
develops,
the greater
the members'
transformations
become.**

Among 40 girls, there are 8 core committee members who received initial training from the Brighter Path Girls' Club program so that they take responsibility for leading the club and organizing the coaching for their peers.

Van Anh, originally a shy girl with no public speaking experience, quickly became much more confident as she had to directly communicate with club members, discussing ideas and proactively taking the lead in the role of a core committee member.

Thu Hien, another one among 8 core committee members, also shared her thanks to the club. She is applying many software and platform ideas when presenting the lessons to the group. She expresses ideas in many different ways and gains more skills in writing the club's plans.

As the core team grew more experienced, they were better able to pass knowledge to their peers, come up with creative learning methods, and properly welcome new club members to help them quickly adapt to the club's environment.

The Brighter Path Girls' Club has proved itself to be very successful in transferring knowledge, as well as, building self-confidence, solid friendships and thereby empowering ethnic minority female students. Knowledge transfer and the collective environment of support is the greatest achievement that the Girls' Clubs have reached.

By teaching sexual and reproductive health, financial literacy, leadership skills and legal rights, the program is reinforcing children and women's rights, empowering the victims of a paternalistic culture to overcome individual and collective barriers, promoting gender equality, and transforming them into agents of change in their rural communities.

HIGHLIGHTED CAMPAIGNS & ACTIVITIES

The World Heart Day 2022 theme is **USE ❤️ FOR EVERY ❤️**. From September 19 to 29, VinaCapital Foundation and Heartbeat Vietnam program celebrated World Heart Day by organizing the World Heart Day Challenge to raise awareness of heart health to millions around the world and bring people together.

Within 10 days, we challenged the public to walk, run or bike to create a heart shape in their cities! Many people joined the **#WorldHeartDayChallenge2022** challenge in Vietnam and from all over the world, including the VinaCapital Foundation team, friends and other sports lovers around the world. Through this challenge, we saw that there was no border or limit to spreading the positive message about our hearts and those of the people who are close to our hearts.

Let's join VCF and Heartbeat Vietnam to **USE ❤️ FOR EVERY ❤️** everyday to spread the word, promote healthy habits and call for actions to bring heartcare to everyone around you. Take good care of your ❤️ to take advantage of its superpowers!

In May, VinaCapital Foundation had the pleasure to welcome Miss Universe Vietnam 2022 contestants to our office. The 2 groups of 20 learned about our work and implemented the *"Heartbeat Vietnam"* and *"Brighter Path"* projects to raise funds for the two programs.

In the project *"Heartbeat Vietnam"*, the contestants had the opportunity to phone directly to one of the children with congenital heart defects and the parents to learn more about their difficult family circumstances and the journey to save the child's life.

In their project for Brighter Path program, the candidates met with 2 of Brighter Path scholars, listening to their experiences and discussing on how to empower girls like them through education.

"Forest Bathing in the City" workshop for COVID-19 orphans with Thuong Foundation and Forest Link for 42 disadvantaged children affected by the COVID-19 pandemic of the VCF's Care to Rise program not only brought new learning experiences to the children but also retained spiritual values when they were immersed in nature at Passage to Vietnam Crafts Village, Cu Chi District, Ho Chi Minh City, and offered opportunities for the students to learn more about the Vietnamese traditional culture.

Every donation, whether big or small, is incredibly vital and meaningful in helping our life-saving journey. Your generous contributions will assist VinaCapital Foundation in saving little hearts, bringing access to quality healthcare - education - clean water to underprivileged communities as well as building medical capacity in the disadvantaged areas. Together, we can transform lives and create better futures for Vietnamese children and women.

Thank You for Transforming Lives!
